6. Recommend to Commission the Tri-County 2026 Safety Targets

Paola Mendez made a motion to recommend to Commission the Tri-County 2026 Safety Targets. Andrea Klopfenstein seconded the motion.

Michael Bruner reported on the following:

- At the federal level, transportation legislation (MAP-21, FAST Act, & IIJA) has mandated the use of performance measures to better assess federal transportation investments progress to achieving national transportation goals.
- The national performance measurement system requires State DOTs and MPOs to set specific targets and report progress in related transportation documents.

- The targets are:
 - Safety (PM-1)
 - Pavement & Bridge Condition (PM-2)
 - System Performance (PM-3)
 - Transit Asset Management
 - Transit Safety
- IDOT set their Safety Performance Measure in August as part of their submission of the Highway Safety Improvement Plan Annual Report to the FHWA.
- MPOs have 180 days to either support State DOT targets or develop their own performance measures from the date the State DOT sets their targets (February 2026)
- It's important to note that state DOTs are the only ones that are assessed for significant progress towards assessed targets, not MPOs
- In the past, TCRPC has elected to support IDOT targets. However, with the Comprehensive Safety Action Plan (CSAP), the region now has a structured, data-driven methodology for monitoring and reporting safety performance.
- Consistent with the CSAP and the adopted Vision Zero Policy, staff recommends applying the plan's staged annual reduction of 4% to eliminate traffic fatalities and serious injuries by 2050.
- Included in the packet is a memo that outlines the Safety Targets.
 - At the bottom of Page 1 is a table that outlines IDOT safety targets.
 - Page 2 is a graph that shows the region's safety data
 - Page 3 shows the region's safety targets with a 4% reduction.

After some discussion, Eric Miller made a motion to amend the reduction to 2%, which was seconded by Jeff Gilles, and the motion carried.
