

North Valley Neighborhood

Community Revitalization Catalyst

Project Overview

EST \$23.05MM

The proposed projects work synergistically to leverage transportation improvements that bolster community and economic redevelopment priorities.

KEY THEMES

- Schools Access
- Bicycle and Pedestrian Facilities
- Public Parks
- Employment Connections
- Recreational Amenity
- Economic Development Catalyst

Segments

1	Spring Street Complete Streets improvements extending from NE Glen Oak Avenue to NE Adams St/IL-29
2	Spring Street realignment and reconstruction extending from NE Adams St/IL-29 to the Illinois River
3	Abington Street reconstruction extending from NE Adams St/IL-29 to N Prospect Road
4	Rock Island Greenway extension connecting the Greenway terminus at Park Avenue to Spring Street

Project Description

North Valley Neighborhood | Community Revitalization Catalyst

The North Valley is located along the Illinois River, immediately north of Downtown Peoria. While the area is classified as historically disadvantaged, the community boasts abundant assets such as local schools, proximity to Springdale Cemetery and the Glen Oak Park complex, charming neighborhood character, and a regional commercial corridor along NE Adams Street and NE Jefferson Avenue (IL-29). The community is prime for a renaissance: the Illinois Department of Transportation recently prioritized the reconstruction of the North Valley's primary vehicular thoroughfare, NE Adams Street and NE Jefferson Avenue (IL-29), in its Multi-Year Plan; Komatsu, a major regional employer, is pursuing a \$30MM facility modernization project at its North Valley location, located at the intersection of NE Adams Street and Abington Road; and the City continues to aggressively champion the completion of the regional Rock Island Greenway that passes through the community.

The identified projects leverage these investments, drawing momentum from the arterials into neighborhood centers to spur economic development. Together, these projects will galvanize community transformation, support safe routes to school for Lincoln K-8 School and Woodruff Career and Technical Center, and reduce congestion by expanding multi-modal transportation options.

Quick Facts

Project Type

- Roadway Redesign and Reconstruction
- Multi-Modal Network Expansion

Jurisdictions

- City of Peoria
- Illinois Department of Transportation (IDOT)
- Greater Peoria Mass Transit District
- Peoria Park District

Districts

- US Congressional District 17
- Illinois State House District 92
- Illinois State Senate District 46

Next Steps

Spring Street Reconstruction

Finalize community engagement and Complete Streets redesign. Fund reconstruction of the roadway extending up the bluff from NE Adams St to NE Glen Oak Avenue.

Spring Street Realignment Design

Acquire any necessary properties, coordinate with IDOT, and conduct preliminary engineering for realignment of the roadway extending from NE Adams Street east to the Illinois River.

Abington Street Reconstruction

Finalize community engagement and Complete Streets redesign. Fund reconstruction of the roadway & pedestrian facilities extending from NE Adams St to N Prospect Rd.

Rock Island Greenway Extension

Finalize design and fund construction costs to bridge the gap in the Rock Island Greenway between Park Avenue and the Illinois River.
