Transportation Improvement Program

Fiscal Year 2027 – 2030

The Tri-County Regional Planning Commission is dedicated to providing access to the transportation planning process and associated planning documents to all people regardless of race, color, national origin, sex, socioeconomic status, English proficiency, or disability. This document was prepared with financial assistance from the Federal Highway Administration and the Federal Transit Administration of the U.S. Department of Transportation through the Illinois Department of Transportation. The opinions, findings, and conclusions expressed in this publication are those of the authors and do not necessarily represent USDOT and IDOT.

Approved and adopted by the Commission on **MONTH DAY, Year**

Executive Summary

The Tri-County Regional Planning Commission (referenced here as TCRPC or Tri-County) serves as the Metropolitan Planning Organization (MPO) for the Peoria-Pekin Urbanized Area. As the MPO, TCRPC prepares the region's Transportation Improvement Program (TIP) annually. The TIP is a short-term plan with a detailed listing of near-term regionally significant projects and represents the programming of transportation improvements for the Peoria-Pekin Metropolitan Planning Area (MPA).

The Fiscal Year 2027 – 2030 TIP is a four-year program of highway, transportation alternatives, and transit projects developed to fulfill the requirements outlined in the current Federal infrastructure bill, the Infrastructure Investment and Jobs Act, 2021 (IIJA). The purpose of the TIP is to document highway, transportation alternatives, and transit projects programmed within the Peoria-Pekin MPA for the next four fiscal years. This includes all surface transportation (highway and transportation alternatives) and public transportation (operations and capital) receiving federal and state funding or the project is regionally significant.

The Fiscal Year 2027 – 2030 TIP is a result of the comprehensive, cooperative, and continuing (3Cs) urban transportation planning process within the Peoria-Pekin MPA. The programs listed in this document have been locally vetted and approved by the Full Commission. Projects included in the Surface Transportation Project Table and the Mass Transit Project Table are eligible to receive federal funding. Project funding is derived mainly from four primary sources, in addition to previously obligated project funding:

- Local tax levies
- Motor fuel tax (MFT)
- State funding
- Federal funding

Additionally, an Illustrative Projects list is maintained to reflect projects that local agencies would like to see implemented but do not currently have a funding source. Therefore, these illustrative projects are not eligible to be included in the Surface Transportation and Mass Transit Project Tables because they are not fiscally constrained.

Overview

The Tri-County Regional Planning Commission (referenced here as TCRPC or Tri-County) was established in 1958 by Peoria, Tazewell, and Woodford counties. Tri-County services the three-county region, supporting 48 communities, and over 350,000 residents.

The primary function of TCRPC is to study the needs and conditions of our region and to develop strategies that enhance the region's communities. Tri-County seeks to promote intergovernmental cooperation, regional planning, and a vision for the future by offering a forum for leaders of local government, defining regional issues, setting goals, and cooperatively implementing plans for the region. Tri-County is the "Steward of the Regional Vision" in Greater Peoria.

Congress passed the Federal-Aid Highway Act of 1962, requiring the formation of Metropolitan Planning Organizations (MPOs) in urbanized areas (UZA) with a population of 50,000+ to provide multi-modal transportation planning. Furthermore, all UZA with over 200,000 in population are classified as a Transportation Management Area (TMA). MPOs were created to ensure that existing and future expenditures for transportation projects and programs are based on a continuing, cooperative, and comprehensive (3Cs) planning process. Federal transportation funding within a metropolitan area is planned and programmed through the MPO process in coordination with federal, state, transit, and local transportation agencies.

As a result, TCRPC was designated as the federally recognized MPO for the Greater Peoria area by Illinois Governor Dan Walker in 1976. As the MPO, TCRPC is responsible for the multi-modal transportation planning process outlined in Title 23 Code of Federal Regulations Part 450 Subpart C¹. The transportation planning process brings together local governments, transportation authorities, and interested parties to create transportation policies and develop comprehensive plans that reflect the region's transportation vision.

¹ 23 CFR 450: <https://www.ecfr.gov/current/title-23/chapter-I/subchapter-E/part-450#subpart-C>

MPO Organization and Duties

The same year TCRPC was federally designated as the MPO for the Greater Peoria area (1976), TCRPC created the Peoria-Pekin Urbanized Area Transportation Study (PPUATS) to carry out the work of the MPO. PPUATS was comprised of two committees: the Policy Committee and the Technical Committee.

From 1976 to 2021, the PPUATS Policy Committee functioned as the MPO. On July 1, 2021, the PPUATS Policy Committee merged with TCRPC. Following the merger, the Commission assumed the MPO's role, duties, and responsibilities. The Technical Committee continues preparing, reviewing, and recommending actions to the Commission for approval.

The Commission directs the transportation planning activities of the urbanized area. The Commission is responsible for adopting and implementing policies and plans to meet federal guidelines, including but not limited to the Long-Range Transportation Plan, the Transportation Improvement Program, and the annual Unified Planning Work Program. It is comprised of elected leaders and senior administrators of the urbanized area's major jurisdictions.

The Technical Committee provides technical expertise to the planning process under the direction of the Commission. The Technical Committee prepares, reviews, and recommends actions to the Commission for approval. The Technical Committee is composed of staff from the urbanized area's jurisdictions.

The MPO coordinates and completes many transportation plans, projects, and studies, some required by federal law. These plans and programs result from the inclusive transportation planning process and delineate the region's future transportation vision, help implement and monitor projects, and provide financial guidance for the MPO.

Metropolitan Planning Area

The Greater Peoria area, also known as the Peoria-Peking UZA, spans three counties, incorporates 16 municipalities, and services over 240,000 residents. The region's UZA includes larger communities like Peoria and Pekin, as well as smaller communities like Bartonville and Germantown Hills. Essentially, the UZA represents the built-up core of the Greater Peoria region. Additionally, the Metropolitan Planning Area (MPA), which is the UZA plus the adjacent area expected to urbanize within 20 years, incorporates eight additional municipalities and increases the population by over 55,000.

The MPA is the full jurisdictional area of the MPO. The US Census Bureau defines the Peoria-Pekin Urbanized Area (UZA) utilizing Decennial Census data. The Census Bureau defines a UZA as "a densely settled [area] that meets minimum population density requirements, along with adjacent territory containing non-residential urban land uses as well as territory with low population density included to link outlying densely settled territory with the densely settled core."

The MPO and Illinois Department of Transportation (IDOT) collaborate to create an adjusted UZA for the purpose of transportation planning. The adjusted UZA includes the Census Bureau UZA, small areas necessary to round off jagged or irregular boundaries, other contiguous areas that the MPO and IDOT consider to be urbanized, and areas likely to be developed within the next five years.

The current adjusted UZA was developed in 2023. The Adjusted UZA is used primarily to determine which roadways are eligible for federal urban funding assistance. Roadways inside the MPA but outside the Adjusted UZA are eligible for both urban and rural funding assistance. A map of the Adjusted UZA and MPA is included in [Appendix C](#).

About the TIP

The TCRPC Transportation Improvement Program (TIP) consists of two components. The first is a static program document (this document) that describes the metropolitan transportation planning and programming process, including how projects are selected, programmed, and advanced through the MPO framework. The second is a dynamic, web-based project listing that is updated regularly and includes all federally funded or regionally significant transportation projects within the MPA. The web-based project listing is amended frequently and managed with an online database called the [eTIP](#).

Requirements

As the designated MPO, TCRPC maintains the region's TIP, which satisfies the requirements described in Title 23, Code of Federal Regulations, Section 450.326 (23 CFR § 450.326). Tri-County prepares the TIP in cooperation with IDOT, Greater Peoria Mass Transit District (GPMTD), and its local member jurisdictions on an annual basis. The TIP is required to be consistent with the adopted Long Range Transportation Plan (LRTP) and identifies all federally funded and regionally significant transportation projects within the MPA over a minimum four-year period. Essentially, the TIP serves as the short-range implementation plan for the region's LRTP.

In accordance with federal regulations, the TIP is required to be financially constrained, meaning it must demonstrate that sufficient revenues are reasonably expected to be available to fund the projects and phases included. The TIP must also support the achievement of established federal performance targets and include sufficient project details, such as scope, location, cost, responsible agency, and implementation phase. The development of the TIP includes opportunities for public involvement and review, and it is approved by both the MPO and the State prior to incorporation into the Statewide Transportation Improvement Program (STIP).

Overview of the TIP

This TIP covers State Fiscal Year 2027 – 2030, with each fiscal year beginning July 1. The TIP includes projects expected to receive federal funding in each fiscal year and regionally significant projects funded by non-federal sources. A regionally significant project is defined in federal transportation planning regulations (23 CFR § 450.104) as any transportation project, regardless of funding source, that would have a significant effect on regional transportation system performance, travel patterns, capacity, or mobility. Non-federally funded projects that are not regionally significant are not required to be included in the TIP. Many local jurisdiction projects, including municipal, township, and county projects, fall into this category.

The TIP serves as the short-range implementation program of the region's LRTP, translating long-term transportation goals and priorities into a program of funded projects over the four-year period. It provides a coordinated listing of surface transportation investments across the MPA and reflects projects programmed for federal transportation funding administered by IDOT and other implementing agencies.

The development and implementation of the TIP is a collaborative effort involving TCRPC, IDOT, GPMTD, and local member jurisdictions. Municipalities, counties, and townships within the MPA play a critical role in identifying, prioritizing, and advancing transportation projects. These local partners are responsible for providing project information, including scope, cost estimates, schedules, and funding sources, and for implementing many of the projects included in the TIP. Ongoing coordination among these partners ensures that the TIP reflects regional priorities and remains consistent with available funding and planning requirements.

The TIP includes the Program of Projects (POP) for the FTA Section 5307 Urbanized Area Formula and Section 5339(a) Buses and Bus Facilities Funds. The POP is developed in cooperation with the GPMTD and identifies transit capital, operating, and planning projects to be funded within the urbanized area. Inclusion of these projects in the TIP, along with the associated public involvement process, satisfies the federal requirement for public review of the POP. Changes to the POP are reflected through TIP amendments or administrative modifications, as applicable.

The development of the TIP is conducted in accordance with Title VI of the Civil Rights Act of 1964 and related nondiscrimination requirements to ensure that no person is excluded from participation in, denied the benefits of, or subjected to discrimination under any program or activity receiving federal assistance. Tri-County also considers Environmental Justice principles, consistent with Executive Order 12898, to identify and address disproportionately high and adverse effects on minority and low-income populations. Through the project selection process and public involvement activities, TCRPC works to promote equitable transportation outcomes and ensure meaningful access to the decision-making process.

The TIP also serves as a key communication and coordination tool, providing transparency in the use of federal transportation funds and supporting coordination among agencies responsible for project delivery. It supports public awareness of planned transportation investments and helps demonstrate how regional priorities are advanced through programmed projects.

Project programming is a dynamic and ongoing process influenced by the need to maintain the existing transportation system while also addressing safety, system preservation, congestion mitigation, multimodal connectivity, and freight considerations. Project selection and prioritization are conducted through established MPO processes in coordination with implementing agencies and funding partners. The TIP is updated annually and amended as needed to reflect changes in project scope, cost, funding sources, and schedules. Amendments and administrative modifications are processed in accordance with MPO procedures and applicable federal and state requirements.

eTIP Database

The TIP is primarily maintained through the region's electronic TIP (eTIP) database, which serves as the official and dynamic record of all programmed transportation projects. The eTIP includes all federally funded transportation projects and regionally significant projects funded with state or local sources. While this TIP document includes the initial approved project listing for the State Fiscal Year 2027–2030 period, it is a static snapshot and will not be updated. The most current and authoritative information on programmed projects is available through the eTIP system at [Tri-County eTIP Database](#).

The eTIP platform is a secure, web-based tool used by TCRPC staff to submit new projects and process amendments or administrative modifications. The system supports the ongoing development, management, and maintenance of the TIP, including verification of fiscal constraint and tracking of project changes over time. Web-based eTIP systems are designed to streamline TIP development and allow agencies and federal partners to review and manage project information more efficiently.

A public-facing version of the eTIP is available through the link above and provides the most up-to-date view of the approved TIP. Users can search, filter, and sort projects; view detailed project information; track amendment history; and explore projects through an interactive map. Project information may be downloaded or printed for reference; however, the eTIP remains the official source for current project listings and amendments. The use of the eTIP enhances transparency and allows the public and partner agencies to access real-time information on transportation investments across the region.

Federally Obligated Projects

Federal regulations require the preparation of an Annual Listing of Federally Obligated Projects (ALOP) that identifies transportation projects for which federal funds were obligated during the preceding federal fiscal year. This listing is prepared as a separate document from the TIP and is used to document actual federal expenditures compared to programmed investments.

The ALOP is published by TCRPC on an annual basis and is made available to the public no later than September 30th. The document may be accessed on the [TCRPC website](#).

Project Selection

The development of the TIP is a cooperative and performance-driven process that ensures transportation investments align with regional priorities, available funding, and federal requirements. Projects included in the TIP are identified through coordination among TCRPC, IDOT, GPMTD, and local member jurisdictions.

At the start of each TIP development cycle, TCRPC issues a Call for Projects to solicit project submissions from local member jurisdictions, including our transit provider, and other eligible sponsors within the MPA. This process provides an opportunity for project sponsors to propose new projects or update existing projects for consideration in the upcoming TIP.

As part of this process, project sponsors are required to submit a BLR 17100 Project Programming Request form for each proposed project. This ensures that all submissions include standardized project information – such as project scope, location, cost estimates, anticipated schedule, and proposed funding sources – necessary for review and consideration. Tri-County staff reviews submitted projects for completeness, eligibility, consistency with federal requirements, and alignment with the region's LRTP.

Combined Call for Projects and Federal Funding Allocation

In addition to project submissions initiated through the TIP development cycle, TCRPC maintains a Combined Call for Projects process for the programming of federally allocated transportation funds administered through the MPO. This process is used to evaluate and recommend projects for funding consideration under applicable federal funding programs.

Submitted projects are reviewed and scored through a structured evaluation process that includes initial review and grading by TCRPC staff, peer review by participating member communities, and final recommendation by the MPO Technical Committee. Final approval of project selections is made by the Commission.

While the TCRPC facilitates this evaluation process for federally allocated funds under its jurisdiction and advocates for the transportation needs of its member communities, it does not control or influence the selection of projects programmed through IDOT-administered programs. Projects funded through IDOT

competitive or statewide programs are included in the TIP once the MPO is notified by the respective member jurisdiction or IDOT District 4 of the award.

Project Programming and Approval Process

Projects included in the TIP are those for which funding has already been identified or is reasonably expected to be available within the TIP period. Project inclusion is based on coordination among TCRPC, IDOT, GPMTD, and local project sponsors to ensure consistency with federal eligibility requirements, the LRTP, and available funding sources. Consideration is also given to federal performance management requirements and applicable planning factors to ensure that programmed projects support the overall transportation goals of the metropolitan planning area.

The Technical Committee reviews proposed projects and provides recommendations to the Commission. The Commission, acting as the MPO Policy Board, is responsible for final approval of projects included in the TIP. This process ensures that project selection reflects both technical analysis and policy-level decision-making.

In addition to locally sponsored projects, IDOT and GPMTD include projects within their respective programs that fall within the MPA. Tri-County coordinates closely with these agencies to ensure that all federally funded and regionally significant projects are incorporated into the TIP and that the program remains fiscally constrained.

Project selection is an ongoing process. Updates to project scope, cost, schedule, or funding may occur throughout the year and are incorporated into the TIP through amendments or administrative modifications, consistent with MPO procedures. This continuous process allows the TIP to remain responsive to changing conditions, funding availability, and regional priorities while maintaining compliance with federal and state requirements.

Financial Plan

Tri-County, in cooperation with IDOT, GPMTD, local governments, and other transportation agencies, has developed a financially constrained TIP for the FY 2027-2030 period. Consistent with federal requirements, the TIP includes only those projects for which funding is committed, available, or reasonably expected to be available during the program period.

The financial plan demonstrates that sufficient revenues are anticipated to implement the projects included in the TIP while continuing to operate and maintain the region's transportation system. Revenue estimates are based on information provided by federal, state, regional, and local transportation agencies and reflect current funding authorizations, grant awards, historical funding trends, and anticipated local matching contributions.

Financial Summary

The TIP programs approximately \$639.1 million in fiscally constrained transportation investments, excluding illustrative projects. Programmed funding includes federal, state, and local revenue sources that are reasonably expected to be available during the TIP period. In addition, the TIP identifies approximately \$849.5 million in illustrative projects that represent regional transportation needs for which funding has not yet been identified. Illustrative projects are not included in the fiscally constrained program and are presented separately.

While the TIP includes all federally funded transportation projects within the MPA, TCRPC directly programs only a limited subset of federal funding sources through MPO-established selection procedures. These funding programs include Surface Transportation Block Grant Urban (STU-Local), Transportation Alternatives Set-Aside for Transportation Management Areas (TA-TMA), Carbon Reduction Program (CRP), and FTA Section 5310 Enhanced Mobility of Seniors and Individuals with Disabilities (FTA 5310 Seniors/Disability). Most remaining federal and state transportation funding is programmed by IDOT, local counties, and transit operators and is incorporated into the TIP through the regional transportation planning process.

Fiscal Constraint

The FY 2027-2030 TIP is fiscally constrained as required under 23 CFR 450.326. The total cost of projects programmed within each fiscal year does not exceed the amount of funding that is committed, available, or reasonably expected to be available during that year.

Project costs and funding commitments are monitored throughout the TIP cycle. As projects advance through planning, design, right-of-way acquisition, and construction, programming adjustments may be necessary to reflect updated cost estimates, grant awards, or project schedules. Any revisions to project funding are processed in accordance with the TIP amendment and administrative modification procedures adopted by TCRPC and described in the TIP Introduction.

Projects identified on the Illustrative Project List are not considered part of the fiscally constrained TIP. These projects represent additional transportation needs and priorities that could be implemented if future funding becomes available through federal discretionary grants, state initiatives, local revenues, or other funding opportunities.

Financial Summary of Programmed Projects

The following tables and graphs summarize programmed transportation investments for the TIP for the FY 2027-2030 period. Of the \$649.5 million of programmed funding:

- Federal Highway Programs account for approximately \$465.9 million.
- Federal Transit Programs account for approximately 36.8 million.
- State Funding Sources account for approximately 112.3 million.
- Local Funding Sources account for approximately 24.0 million.

Approximately 73 percent of programmed funding is derived from federal highway and transit programs, demonstrating the continued importance of federal transportation investment within the region.

Fund Type	2027	2028	2029	2030	Total

Table 5: Financial Summary

Performance Measures

Tri-County implements a performance-based planning and programming (PBPP) approach to ensure that transportation investments support regional and national goals. This approach establishes a direct relationship between the goals and objectives identified in the LRTP and the projects programmed in the TIP.

Performance-based planning uses data-driven decision-making to evaluate system conditions, identify needs, and prioritize investments that contribute toward achieving established performance targets. These targets are developed in coordination with the Illinois Department of Transportation (IDOT), the Federal Highway Administration (FHWA), the Federal Transit Administration (FTA), and local transit providers.

TCRPC supports IDOT's statewide performance targets for highway measures and coordinates with the GPMTD on transit-related performance targets, including Transit Asset Management (TAM) and Public Transportation Agency Safety Plan (PTASP) measures. Project selection and programming decisions consider performance outcomes alongside project readiness, funding availability, and consistency with regional priorities identified in the LRTP.

Federal funding for transportation projects is programmed through the transportation planning process. TCRPC receives federal funding on an annual basis to carry out a 3C transportation planning process within the TCRPC MPA, as outlined in federal legislation. These funds are distributed through IDOT from FHWA and FTA.

Linking the TIP to Performance Outcomes

Projects included in the TIP are selected and prioritized based on their ability to address identified system needs and contribute toward achieving performance targets. This connection is established through the LRTP, which identifies regional priorities such as safety, system preservation, mobility, and reliability, and organizes investments into defined project categories.

In general, TIP projects contribute to performance outcomes in the following ways:

- **Bridge** – Projects focused on bridge rehabilitation or replacement improve structural condition and help reduce the percentage of bridges in poor condition on the National Highway System (NHS), supporting infrastructure condition performance targets.
- **Enhancement** – Enhancement projects, including bicycle and pedestrian facilities, streetscape improvements, and multimodal connections, improve accessibility, mobility, and quality of life while also contributing to safety outcomes, particularly for non-motorized users.
- **Pavement Preservation** – Resurfacing and maintenance projects extend the life of existing roadway assets and help maintain pavements in a state of good repair, directly supporting pavement condition performance targets.
- **Reconstruction** – Reconstruction projects address roadways that have reached the end of their useful life and require full replacement. These projects significantly improve asset condition, system reliability, and long-term performance.
- **Safety** – Safety projects, such as intersection improvements, roadway reconfigurations, and traffic control enhancements, are specifically designed to reduce fatalities and serious injuries for all users, directly supporting national safety performance goals.
- **Transit** – Transit investments, including vehicle replacements, facility improvements, and operational upgrades, support TAM and PTASP targets by improving system reliability, safety, and the state of good repair for transit assets.

While individual projects may be categorized based on their primary purpose, many contribute to multiple performance areas. Collectively, the TIP represents a coordinated program of investments that advances progress toward achieving regional and national transportation performance targets.

Progress Toward Meeting Targets

Progress toward performance targets is achieved through the cumulative implementation of projects programmed in the TIP, in coordination with state and local agency efforts. Tri-County and its partner agencies are actively working toward achieving performance targets through ongoing planning, programming, and project implementation.

Examples of how progress is being made include:

- Continued investment in system preservation, which represents a significant portion of programmed funding and directly supports pavement and bridge condition targets;
- Implementation of safety-focused projects, including roadway improvements and multimodal enhancements, aimed at reducing crash frequency and severity;
- Coordination with IDOT and local agencies to ensure that projects on the National Highway System (NHS) align with statewide performance priorities;
- Transit investments in vehicle replacement and facility improvements, helping reduce the percentage of assets beyond their useful life and improving service reliability;
- Integration of performance considerations into project development, including consistency with LRTP goals and identified needs.

Performance Measure Summary Tables

This section summarizes the performance measures and targets applicable to the TCRPC region, including those established by IDOT and GPMTD.

Tri-County supports IDOT's statewide performance targets for highway safety (PM1), pavement and bridge condition (PM2), and system performance (PM3), as well as transit performance targets established through the Transit Asset Management (TAM) and Public Transportation Agency Safety Plan (PTASP) processes.

The following tables present the adopted statewide targets, the methodology used to establish those targets, and MPO-level baseline data with equivalent values provided for planning context. MPO-equivalent values are estimates only and do not represent formally adopted targets.

Following each performance measure summary, a table identifies TIP projects that are expected to contribute toward achieving the applicable targets and the anticipated outcomes of those investments. Where appropriate, similar projects are grouped together to illustrate their collective contribution to improving system performance and advancing the goals and objectives of the Long-Range Transportation Plan (LRTP).

Highway Safety Performance Measures

Performance Measure	2026 Target	Method	MPO Baseline	MPO Equivalent Target*
Number of Fatalities (K)	1,077.5	2% Annual Reduction	38.00	36.50
Rate of Fatalities	1.061	2% Annual Reduction	1.72	1.65
Number of Serious Injuries (SI)	7,215.5	Ordinary Least Squares Linear Trend	239.20	213.72
Rate of Serious Injuries	7.595	Ordinary Least Squares Linear Trend	10.78	9.45
Number of Non-Motorized K	194.4	2% Annual Reduction	5.00	4.80
Number of Non-Motorized SI	1,094.8	Ordinary Least Squares Linear Trend	29.00	27.48
Non-Motorized K & SI	1,289.3	Non-Motorized K + Non-Motorized SI	34.00	32.28

Project Category	TIP No.	Expected Outcome
Enhancement	C-27-01; MO-28-01; PEO-26-02; PH-26-01	Increases active transportation usage by providing dedicated space for non-motorized users.
Reconstruction	PC-24-03; PC-27-01; PC-27-02, S-26-07; S-26-08	Reduces conflict points with dedicated center turn lane; Increases active transportation usage by providing dedicated space for non-motorized users; Improves pavement condition
	PEK-27-01; PEO-27-01; PEO-28-01; PEO-28-02; PH-28-01	Improves pavement conditions and increases active transportation usage by providing dedicated space for non-motorized users
Safety	MO-20-01; PEK-24-01; W-24-02	Improves safety at railroad crossing
	PC-27-03; S-24-06; S-26-09; S-27-14	Reduces the frequency and severity of crashes; Improves traffic operations by reducing delays, congestion, and vehicle conflicts.
	S-26-03	Replace deteriorated culvert to maintain roadway integrity, improve drainage, reduce flooding risk, and extend infrastructure service life.
Transit	5310-26-01	Improves transit access, increase safety crossing IL-116 (Main St)

Table 10: PTASP TIP Projects

Public Participation

The development of the TIP is carried out in accordance with the TCRPC Public Participation Plan (PPP) and applicable federal requirements for metropolitan transportation planning process. Tri-County provides reasonable opportunities for public review and comment throughout the development and adoption of the TIP to ensure transparency and meaningful public involvement in the transportation planning process.

Draft versions of the TIP are made available for public review through the TCRPC website, the electronic TIP (eTIP) system, and at the TCRPC office. The eTIP serves as the primary and most current source for viewing programmed transportation projects within the MPA. Public notices announcing the availability of the draft TIP and associated review period are published in local newspapers and through appropriate electronic notification methods. The public comment period is no less than 30 days.

The public participation process used for the TIP satisfies the federal requirement for public involvement in the development of the TIP, including the Program of Projects for FTA Section 5307 transit funds.

During the public comment period, at least one public meeting is held to provide an opportunity for individuals and organizations to provide input on the draft TIP. Public meetings are held at accessible locations in compliance with the Americans with Disabilities Act (ADA), and reasonable accommodations are provided upon request. Written and verbal comments received during public meetings are documented and incorporated into the TIP review process. Responses to substantive comments are provided prior to final adoption of the TIP when feasible, or otherwise documented as part of the final TIP record.

Public comments are accepted through multiple methods, including email, telephone, mail, and direct submission at public meetings or through MPO committee representatives. All meetings of the Full Commission and Technical Committee are open to the public, and opportunities for public comment are provided in accordance with established meeting procedures and the Illinois Open Meeting Act.

The TIP is not adopted until the public involvement process is complete and all substantive comments have been considered. Where appropriate, revisions are made to the TIP in response to public input, or responses are provided explaining why changes were not incorporated.

Amendment Procedures

The TIP is maintained through the region's eTIP system, which serves as the official record of all programmed transportation projects. Changes to the TIP may occur throughout the year to reflect updates in project scope, cost, schedule, or funding. These changes are processed as either TIP amendments or administrative modifications, depending on the nature and magnitude of the revision.

All TIP amendments and administrative modifications are processed in accordance with MPO public participation procedures and applicable federal and state requirements.

The eTIP system maintains the current status of programmed projects as well as a record of approved amendments and administrative modifications. Users should refer to the eTIP database for the most current project information and amendment history, as the TIP document itself is not updated following adoption.

TIP Amendment

A TIP amendment represents a significant change to the TIP that requires action by the Full Commission following recommendation by the MPO Technical Committee. Amendments are required for major revisions that substantially alter the intent, scope, or financial structure of a programmed project.

Examples of actions that require a TIP amendment include:

- Addition or removal of a federally funded project from the TIP;
- A change in federal funding greater than 50 percent of the previously programmed amount;
- A significant change in project scope, purpose, limits, or work type;
- Addition of a new funding source or project phase not previously programmed; or
- Movement of a project from the Illustrative Project List into a fiscally constrained year of the TIP.

All amendments are reviewed through the MPO committee process and approved by the Full Commission prior to incorporation into the eTIP system, which serves as the official record of TIP actions.

Administrative Modification

Administrative modifications are minor changes that do not require Full Commission action. These changes are processed by TCRPC staff and are reflected directly in the eTIP system following coordination with project sponsors and funding partners.

Administrative modifications may include, but are not limited to:

- Changes in federal funding of less than 50 percent of the previously programmed amount;
- Movement of a project between fiscal years that does not affect fiscal constraint;
- Minor revisions to project descriptions, termini, or implementing agency information;
- Updates to funding sources that do not add a new funding category or materially affect fiscal constraint; and
- Other minor revisions that do not significantly alter project scope, cost, or intent.

Administrative modifications ensure that the TIP remains current while maintaining consistency with federal and state requirements.

Advanced Construction

Projects utilizing the Illinois Department of Transportation (IDOT) Advanced Construction (AC) process may be included in the TIP when programmed for federal eligibility. Advanced Construction allows a project to proceed using non-federal funds while preserving eligibility for future federal reimbursement.

When a project is converted from Advanced Construction to federal funding, this change is reflected in the eTIP system as funding becomes available. Such conversions are typically processed as administrative modifications, provided there is no significant change in project scope or intent. A project must be included in the TIP to be eligible for Advanced Construction.

Project Listing

The Fiscal Year 2027 – 2030 TIP is a schedule of projects that are consistent with the policies and needs articulated in the region's LRTP. The project listings presented in this document reflect the approved program at the time of TIP adoption. As described in the preceding eTIP Database section, the eTIP serves as the official source for current project information and any subsequent amendments or administrative modifications.

Understanding the Listings

The TIP is divided into two sections based on the type of transportation work to be completed: Surface Transportation projects and Mass Transit projects. The following project listings include all federally funded transportation projects programmed within the MPA during the four-year TIP period and are generally organized by the federal fiscal year in which they are scheduled for implementation.

All projects are identified by their TIP Number. This three-part number identifies where a project is located within the TIP. The first is a letter or letters indicating the agency associated with a given project. The second part indicates the fiscal year under which a project is listed, and the third part identifies each project in the given fiscal year. See [Table 11](#) for a full glossary of the abbreviations of member jurisdictions.

Abbr.	Entity
BA	Village of Bartonville
C	City of Chillicothe
CC	Village of Creve Coeur
CL	CityLink
EP	City of East Peoria
GH	Village of Germantown Hills
MO	Village of Morton
PC	Peoria County
PEK	City of Pekin
PEO	City of Peoria
PH	Village of Peoria Heights
S	State of Illinois
MPO	Tri-County Regional Planning Commission
TZ	Tazewell County
W	City of Washington
WC	Woodford County
WP	City of West Peoria

Table 11: Abbreviations of MPO Member Jurisdictions

Surface Transportation Projects

The programming of highway and non-motorized transportation funds is a major function of IDOT and TCRPC. Multiple sources of federal and state funds are available, including the National Highway Performance Program (NHPP), STBG-Urban, STBG-Rural, HSIP, TA, ITEP, SRTS, and the Federal Recreational Trails Program (RTP). Descriptions of these funding programs and their eligibility requirements may be found in [Appendix C](#).

ID	Year	Agency	Title	Description	Fund Types (All)	Total Cost	Federal	State	Local	TDC

Mass Transit Projects

Mass transit funds are primarily programmed by the mass transit agency, IDOT, and the FTA. The local transit agency, the Greater Peoria Mass Transit District (GPMTD or CityLink), handles a majority of the region’s mass transit needs. CityLink’s jurisdiction includes the communities of Peoria, Peoria Heights, and West Peoria, and they also serve the communities of East Peoria and Pekin contractually. Other local service providers, typically affiliated with or operated by non-profit agencies, are also eligible to receive federal funds for transit.

As described in the preceding TIP Overview section, the TIP includes the POP for the FTA Section 5307 Urbanized Area Formula and Section 5339(a) Buses and Bus Facilities Funds. Inclusion of these projects in the TIP, along with the associated public involvement process, satisfies the federal requirement for public review of the POP.

S-27-15	2027	State of Illinois	IDOT Section 5310 Capital Program - Peoria, IL UZA	IDOT Section 5310 Capital - paratransit vehicle replacements /expansion for Peoria, IL UZA. Please note, this project is funded 100% by federal cash. Normally, federal grants require local public agencies to pay a 20% non-federal match. Instead of cash, this project uses Transit Development Credits (TDC), also known as Toll Credits, to fulfill that matching rule. It is important to know that Toll Credits are not actual dollars and add no new money to the project budget; they are simply accounting points showing credit usage. The federal funding row displays the full, actual dollar cost of the project.	FTA 5310 Seniors/Disability	\$206,167	\$206,167	\$0	\$0	\$41,233

Illustrative Projects

Federal regulation 23 CFR 450.326, paragraph j states "... for illustrative purposes, the financial plan may include additional projects that would be included in the TIP if reasonable additional resources beyond those identified in the financial plan were to become available."²

Separate from the TIP's Surface Transportation Project Listing and Mass Transit Project Listing, an Illustrative Project Listing (future projects) is maintained to reflect local jurisdictions' projects that would be included in the TIP if reasonable funding sources were available. Without reasonably guaranteed funding sources, a project cannot be considered fiscally constrained; therefore, it would be ineligible to be included in the active four-year period of the TIP and cannot receive federal funding authorizations.

Through the transportation planning process, projects have been identified as desirable and regionally significant, but they have no associated funding sources identified or confirmed. These projects are included due to the difficulty of forecasting future budgets and funding opportunities. To be eligible to include a project in the Illustrative Project Listing, the project must be listed in Tri-County's current Long-Range Transportation Plan (LRTP).

Once federal funds are allocated to a specific project in the Illustrative Project Listing, all local matches must be identified, or the project cannot be placed in the active four-year period of the TIP. Formal amendment action is required to move a project from the Illustrative Project Listing to the active four-year period of the TIP. Administrative Modifications are used for adding, removing, or changing a project in the Illustrative Project Table.

The following project listing should be considered illustrative and intended as a guide only. All illustrative projects are numbered as follows: FP (Which stands for Future Project) – Abbreviations of Entities (See [*Table 11*](#)) – numerical numbering in ascending order for each entity's illustrative project.

Appendix A: Adoption Resolution

RESOLUTION 27-##

A RESOLUTION OF THE TRI-COUNTY REGIONAL PLANNING COMMISSION TO ADOPT THE FISCAL YEARS 2027 – 2030 TRANSPORTATION IMPROVEMENT PROGRAM.

WHEREAS, the Tri-County Regional Planning Commission, hereafter referred to as the Commission, is recognized as the Metropolitan Planning Organization (MPO) for the Peoria-Pekin Urbanized Area; and

WHEREAS, Title 23 Code of Federal Regulations Part 450 (23 CFR § 450) requires the Commission to carry out a continuing, cooperative, and comprehensive (3C) transportation planning process and develop a Transportation Improvement Program (TIP), at least every four years, consisting of a comprehensive list of transportation projects that receive federal funds or that are regionally significant as a condition to the receipt of federal transportation assistance; and

WHEREAS, the transportation programming process shall be developed in accordance with the above-stated regulation, be fiscally constrained, address no less than a four-year planning horizon, and be consistent with the Commission's adopted Long Range Transportation Plan; and

WHEREAS, for illustrative purposes, the TIP financial plan may include additional projects in the TIP if reasonable additional resources beyond those identified in the financial plan were to become available; and

WHEREAS, the TIP was developed through a participatory process as prescribed in the Commission's Public Participation Plan (PPP), and public comment on the draft TIP was sought and received during the public comment period from Month Day, Year, through Month Day, Year, with one public meeting during the Month Day, Year, MPO Technical Committee; and

WHEREAS, on Month Day, Year, the Technical Committee recommended to the Commission the adoption of the TIP, which lists the federally funded and regionally significant transportation projects in the Peoria-Pekin Urbanized Area; and

WHEREAS, the Commission has reviewed the TIP and found it consistent with the policies, plans, and programs, including the most recent Long-Range Transportation Plan adopted by the Commission.

NOW, THEREFORE, BE IT RESOLVED that the Tri-County Regional Planning Commission hereby approves and adopts the Fiscal Year 2027 – 2030 Transportation Improvement Program.

Appendix B: Self-Certification Resolution

RESOLUTION 27-##

A RESOLUTION OF THE TRI-COUNTY REGIONAL PLANNING COMMISSION TO SELF-CERTIFY THE METROPOLITAN TRANSPORTATION PLANNING PROCESS IS BEING CARRIED OUT IN ACCORDANCE WITH TITLE 23 CODE OF FEDERAL REGULATIONS PART 450.

WHEREAS, the Tri-County Regional Planning Commission, hereafter referred to as the Commission, is recognized as the Metropolitan Planning Organization (MPO) for the Peoria-Pekin Urbanized Area; and

WHEREAS, Title 23 Code of Federal Regulations Part 450 (23 CFR § 450) requires MPOs to Self-Certify at least every 4 years, concurrent with the submittal of a proposed Transportation Improvement Program (TIP) as part of the State TIP (STIP) approval, that the metropolitan transportation planning process is being carried out in accordance with all applicable requirements; and

WHEREAS, Section 134 of Title 23 United States Code (USC), 49 USC 5303, and 23 CFR Part 450 Subpart C set forth the national policy that the MPO designated for each urbanized area is to carry out a continuing, cooperative, and comprehensive (3C) multimodal transportation planning process, including the development of a Long-Range Transportation Plan (LRTP) and TIP, and establish policies and procedures for MPOs to conduct the metropolitan planning process; and

WHEREAS, the requirements of Sections 174 and 176C and (d) of the Clean Air Act as amended [42 U.S.C. 7504, 7506C and (d)] and 40 CFR Part 93 have been met with the Greater Peoria Metropolitan Planning Area (MPA) remaining in attainment; and

WHEREAS, the requirements of Title VI of the Civil Rights Act of 1964 as amended (42 USC 2000d-1) and 49 CFR Part 21 assures that no person or group of persons on the basis of race, color, or national origin are subject to discrimination in the level and quality of transportation planning programs and activities provide by the MPO; the requirements of Executive Order 12898 "Federal Actions to Address Environmental Justice in Minority Populations and Low-income Populations" and Executive Order 13166 "Improving Access to Services for Persons with Limited English Proficiency" have been met and incorporated in the Commission's Title VI Program; and

WHEREAS, 49 USC 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex or age in employment or business opportunity has been met by the Commission; and

WHEREAS, the requirements of Section 1101C of the Fixing America's Surface Transportation (FAST) Act (Public Law 114-357) and 49 CFR Part 26 regarding the involvement of disadvantaged or minority business enterprises in FHWA-funded planning projects and FTA-funded projects have been met by the Commission's Procurement Policy; and

WHEREAS, the provisions of 23 CFR Part 230, regarding the implementation of an equal employment opportunity program on federal and federal-aid highway construction contracts have been addressed; and

WHEREAS, the provisions of the Americans with Disabilities Act of 1990 (42 USC 12101 et seq.), and 49 CFR Parts 27, 37, and 38, regarding discrimination against individuals with disabilities has been met by the Commission; and

WHEREAS, the Older Americans Act, as amended (42 USC 6101), prohibiting discrimination on the basis of age in programs or activities receiving federal financial assistance has been met; and

WHEREAS, Section 324 of Title 23 USC regarding the prohibition of discrimination based on gender has been met by the Commission; and

WHEREAS, Section 504 of the Rehabilitation Act of 1973 (29 USC 794) AND 49 CFR Part 27 regarding discrimination against individuals with disabilities have been met by the Commission; and

WHEREAS, in accordance with 23 CFR § 450.336, the Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) certified the planning process of the Greater Peoria MPA in May 2022.

NOW, THEREFORE, BE IT RESOLVED that the Tri-County Regional Planning Commission hereby certifies that its metropolitan transportation planning process is being carried out in conformance with all the applicable provisions of federal law and certifies that the local process to enhance the participation of the general public, including the transportation disadvantaged, has been followed in developing all transportation plans and programs, including the Commission's Long-Range Transportation Plan and Transportation Improvement Program.

Appendix C: Metropolitan Planning Area

Figure 1: Tri-County Metropolitan Planning Area

Appendix D: Environmental Justice

Title VI of the Civil Rights Act of 1964 states that no person shall on the ground of race, color, or national origin be excluded from participation in, denied the benefits of, or subjected to discrimination under any program or activity receiving federal financial assistance. As a result, all agencies receiving federal assistance must demonstrate compliance with the Title VI requirements.

To reaffirm the Title VI legislation goals, President Clinton signed Executive Order 12898 “Federal Actions to Promote Environmental Justice in Minority Populations and Low-Income Populations” on February 11, 1994. Executive Order 12898 requires each federal agency to make Environmental Justice (EJ) part of its mission by identifying and addressing disproportionately high and adverse human health or environmental effects of its programs on minority and low-income populations.

Presidential Executive Order 12898 and the derivative DOT and FHWA Orders required that minority and low-income populations must be treated fairly and equitably, compared to other non-minority and more fortunate higher-income populations. In simple terms, this means that as TCRPC expends federal dollars, it:

1. Should not allow a disproportionate share of the adverse impacts of activities to fall upon minority and low-income populations;
2. Should make a concerted effort to determine which populations will be affected, before Tri-County spends any federal funds, implements any federal program, imposes any federal regulations, or causes any adverse or harmful impacts;
3. Should, periodically, review and analyze the MPO’s past actions to determine if TCRPC is, in fact, treating all groups equitably; and,
4. Should make concerted efforts to involve minority and low-income groups in the decision-making process as activities are planned and programmed.

The overall goal of the Executive Order is to ensure that all communities and people live in a safe and healthy environment. Further, the Order recognizes that many undeniably beneficial public works projects, infrastructure improvements, and governmental actions are often accompanied by adverse or undesirable impacts. Therefore, the order seeks to ensure that minorities and low-income communities do not bear the brunt of a project's adverse impacts while seeing few of the benefits.

In compliance with the Executive Order, the DOT issued its final order on February 3, 1997. The Order described the process to incorporate EJ principles embodied in the Executive Order into existing programs, policies, and activities. To comply with the DOT Order, the FHWA issued their action statement to address EJ on December 2, 1998.

As a matter of policy, Title VI/EJ is incorporated into all TCRPC transportation planning efforts. Tri-County is committed to considering its decision-making on the views of historically underserved constituencies, including minority communities and low-income residents. Tri-County considers Title VI/EJ while developing the TIP.

Demographic Data and Methodology

An understanding of regional disadvantaged population groups is necessary to ensure that the MPO's planning, project development, and public participation efforts effectively reach all segments of the community. Tri-County utilizes demographic and socioeconomic data from the U.S. Census Bureau's American Community Survey (ACS) to identify concentrations of populations that may be more dependent on transportation services or more vulnerable to the adverse impacts of transportation decisions. These populations include minority populations, low-income households, persons with disabilities, older adults, households with limited English proficiency (LEP), households without access to a vehicle, and other traditionally underserved groups.

To better understand the geographic distribution of transportation need throughout the region, Tri-County combines multiple demographic indicators into a composite Transportation Need Index. Rather than assigning greater importance to any one demographic characteristic, each variable is standardized relative to regional conditions and incorporated equally into the analysis. This approach allows TCRPC to identify

areas where multiple transportation-disadvantaged populations are concentrated while avoiding bias caused by differences in the range or distribution of individual datasets.

The resulting Transportation Need Index identifies areas with relatively lower and higher concentrations of transportation-disadvantaged populations throughout the MPA. This analysis is used to inform transportation planning activities, public outreach efforts, project development, and funding decisions. By identifying areas with elevated transportation needs, TCRPC can better evaluate potential benefits and impacts of transportation investments and help ensure compliance with Title VI and Environmental Justice principles.
